

# Transfer Factor Plus®

EQUINE PERFORMANCE & SHOW™

4Life®

*"For decades, the approach to maintaining health was to wait for signs and symptoms of disease to occur and to counter the challenge with an array of drugs which were toxic for the disease causing agent. This approach is now being questioned as the armada of drugs is diminishing due to multiple drug resistant pathogens. So the question arises...what if a new paradigm existed? Could it be possible to optimize immune status so that disease is much less likely to occur and if it does occur, it's severity and duration is minimized? The answer is yes and this shift is being engineered by small naturally occurring protein-like molecules called transfer factors."*

-Dr. Richard Bennett, Comparative Pathologist

## Daily Equine Immune Support

4Life's Transfer Factor Performance and Show is a proprietary blend of immune support ingredients formulated with patented 4Life Transfer Factor Plus Advanced Formula. The power of this formulation lies in the synergy of correct ratios of minerals, trace minerals, vitamins, amino acids, probiotics, essential fatty acids and the unprecedented immune support of 4Life Transfer Factor Plus Advanced Formula.

## What is 4Life Transfer Factor Plus Advanced Formula?

4Life Transfer Factor Plus Advanced Formula provides far-reaching immune support. It combines the synergistic power of 4Life Transfer Factor Advanced Formula with the proprietary blend Cordyvant to nourish, strengthen and activate the immune system. Cordyvant contains ingredients that support the innate immune system, your first and instinctive response when your body is threatened.

Developed exclusively by 4Life, using patented and patent-pending technology, the E-XF proprietary blend used in 4Life Transfer Factor Plus Advanced Formula calls upon the knowledge of two sources to provide an enhanced combined effect of transfer factors from both cow colostrum and chicken eggs. Research shows that the immune-building effects of this transfer factor blend are more potent than that of colostrum or egg sources alone.

## Recommended Use:

Today's horses are pushed hard, facing many challenges such as travel, exposure to various pathogens, the stress of gestation, sales preparation and performance. For use in situations where optimal immune function is desired to maintain and support overall health and wellness. Transfer Factor Plus Performance and Show is safe at all stages of life from foal to the geriatric horse.

## Safety

This product is designed to assist immune system function and will not interfere with routine feeding schemes. It can be used safely with medications, including antibiotics.
